

Assignment 2 Winter 2024

Instructions:

This is an individual assignment!

It requires you to develop a simple Portfolio page with Html , CSS and Javascript.

The page should consist of the main components for a Resume such as Summary,Skills, Education, Work Experience and Projects.

During the course Labs we will be covering the main features you can implement for the design of your page.

The Portfolio - Assignment 2 is due @19 April (last day of the course).

It is also preferable if you use Bootstrap for consistent styling and all the components to be developed from the Javascript side. But as a minimal requirement is to use regular HTML,CSS,JS.

Good Luck!
